Biotherapeutic Drainage™ & unda® Numbered Compounds 7 Session Series

Presented by Robert Abell ND LAc

7 Sessions-2hrs ea **Teleconference Series Recorded**
Jan. 28-Apr. 22, 2009

This is an introduction to the concept and philosophy of Biotherapeutic Drainage™, an intra-cellular and extra-cellular drainage process. Many practitioners find this to be the most effective therapeutic approach for the treatment of chronic and degenerative conditions. Learn the technique of using organ-specific remedies to facilitate the discharge of toxic material. Through extensive clinical experience and case studies, understand how to implement the unda® Numbered Compounds, the GENESTRA BRANDS™ nutritional products and other modalities into individualized treatment guidelines. Different systems will be discussed with particular emphasis on the nervous, endocrine, musculoskeletal, digestive and cardiovascular systems. Learn more on protocols for the following indications: hypercholesterolemia; hyperlipidemia; thyroid disorders; cholecystitis; diarrhea, female hormonal problems; impotence; ulcers; neuralgia; sciatica; constipation; hemorrhoids; depression; asthma; rhinitis; bronchitis; rheumatism; arteriosclerosis; hypertension; skin disorders; psoriasis; varicosities; and phlebitis.
