## Clinical Application of Gemmotherapy, Oligo-Elements, Plexes and Schüssler Salts 7 Session Series

*Presented by Robert Abell ND LAc*

Available  
Jan. 1, 2010

7 Sessions-2hrs ea Teleconference Series Sept 16-Nov. 25, 2009

This 7 session teleconference series is designed to expand your knowledge and introduce the use and applications of Gemmotherapy, Oligo-elements, Plexes and Schüssler Salts. Through his extensive experience and personal case studies, Dr. Abell will review how to incorporate these Biotherapeutics into simple and easy-to-follow treatment guidelines, ensuring successful results in everyday practice. Each of these biological therapies are individual treatment modalities, but when utilized in a systematic approach using Biotherapeutic Drainage™, they become a synergistically advanced form of medicine. Incorporating each of these therapies into your practice will provide you with the tools and protocols to treat chronic and acute conditions that past experience posed as challenging and in some cases, untreatable.
