

Neurological Health

Assessment and Treatment of Neuro-developmental & Neurological Disorders

Presented by Robert Abell ND LAc

2 Day Session Seminar Recorded May 5-6, 2007

The goal of this seminar is for the participant to develop a comprehensive understanding of the etiology and pathogenesis of neurodevelopmental and neurological disorders such as autism, Alzheimer's and Parkinson's diseases, and multiple sclerosis. Dr. Abell will discuss in great detail autistic spectrum disorders (ASD) and Attention Deficit Hyperactivity Disorder (ADHD) delving into the rising incidence of autism. He will also discuss the emotional and energetic causative factors, and the symptomology of autism and neurological disorders. He will examine the possible link to vaccines, viral infection, heavy metal toxicity, environmental toxins, digestive health and nutrition. Dr. Abell will present successful clinical cases showing how autism can be treated and reversed, as well as cases for Alzheimer's and Parkinson's diseases, and multiple sclerosis. Dr. Abell will discuss his clinically-proven therapeutic approach integrating various modalities including Biotherapeutic Drainage™ and the homeopathic Rebalancing and Harmonizing Program (or "brain protocol").
