## **The Advantage of Phyto-gens**

*Presented by Robert Abell, ND, LAc*

---

Teleconference Recorded May 13, 2009

---

GENESTRA BRANDS™ Phyto-gens are a harmonized blend of plant meristems combined to create a phytotherapy that is synergistically formulated to extract the full potential and pluripotent nature of these embryological plant tissues. All Phyto-gens are standardized to a 1:20 extract, made by combining equal parts of water, natural glycerin and organic ethanol mediums. Phyto-gens stimulate the body to rebalance its normal physiology by modifying biochemical actions. Phyto-gens are easy-to-prescribe, condition specific remedies that yield dramatic patient results. Treatment guidelines will be provided for: allergies, anti-aging; immune stimulation; osteoporosis; anxiety and neurosis; circulatory disorders; post chemo and radiation treatments; GERD and Digestive Issues; menopause; hypo & hyper thyroid; and many more.
