## **Humanities Greatest Threat and How to Support Your Cancer Patient**

*Presented by Dickson Thom DDS ND*

---

**Teleconference Recorded Nov. 12, 2008**

---

Even with advances in modern technology and new resources, cancer continues to be humanity's greatest threat. Practitioners urgently need to use their knowledge and tools to offer patients a journey towards optimum health as the best cancer prevention. Better understand cancer and general approaches on how to help support your patients using a variety of therapies including unda® Numbered Compounds, Gemmotherapy, Schüessler Salts, Organotherapy and Single Remedies. Build the knowledge necessary to know what practitioner goals should be when support cancer patients. Learn more about cancer statistics, the theories of the etiology of cancer (molecular, host factors, environment, lifestyle). Review screening guidelines and obtain an overview on conventional therapies. Understand the role of an ND in cancer management and the 3 aspects guiding the ND approach. Learn about the naturopathic model for wellness to prevent cancer (Constitution, Temperament, Miasm).
