

# Patient Evaluation

---

## Holistic Assessments and Treatments

*Presented by Dickson Thom DDS ND*

**2 Day Session**

**Seminar Recorded Feb. 10-11, 2007**

Insufficient patient assessment often leads to inaccurate diagnosis and less than adequate patient care, resulting in disappointment for both the patient and the practitioner. Often, the wrong body systems are treated and improvements are slow and superficial. Learn more on how to advance your skills of assessment and diagnosis in order to enhance treatment protocols and patient outcomes. Treatment guidelines will be provided for: insomnia & depression; hypertension & migraines/headaches; PMS; infertility; menopause; and breast cancer.
