

Chronic Degenerative Diseases

Pain Management for Acute and Chronic Disease

Presented by Dickson Thom DDS ND

Teleconference Recorded Apr. 15, 2009

Pain management is essential for many patients with both acute and chronic health problems. Learn about the basic physiology of pain, and nociceptive vs neuropathic pain. Understand how to assess and address using a variety of naturopathic approaches for pain management including diet, nutraceuticals, botanicals and drainage remedies. Treatments guidelines are provided.
