

Pediatric Health

Clinical Applications Supporting Pre and Post Childhood Vaccination

Presented by Mikhael Adams ND

Wednesday, April 14, 2010

5:00 PM – 6:30 PM PST | 8:00 PM – 9:30 PM EST

The issue of childhood vaccinations is a complex and often confusing topic for parents who should be encouraged to explore the critical questions and research concerning risks and benefits. As a healthcare provider, you are an excellent source of advice and support for parents searching for a natural solution to support their child's health and well being, and in reducing the increased risks of chronic conditions later in life. Dr. Adams will share from his many years of clinical experience a naturopathic approach to providing treatments and support to minimize the side effects of vaccinations.

TREATMENT GUIDELINES PROVIDED FOR

- Side effects, immediately after vaccinations
- Side effects, 2 weeks to years after vaccinations
- Diseases occurring as a result of not vaccinating
- Protocol for preventing future diseases when vaccinating

KEY LEARNING HIGHLIGHTS

- The importance of vaccinations
- What vaccinations are necessary
- Consequences of vaccinations
- Why and when not to vaccinate
- Unnecessary vaccinations
- Consequences of not vaccinating
- Alternatives to vaccinations
- Protocol for vaccinating safely
